

CALL FOR PROPOSALS

You are invited to participate in the Annual Meeting of the American Society of Clinical Psychopharmacology (ASCP) to be held at the Loews Miami Beach Hotel on May 26 – 29, 2026, by submitting a proposal and attending the meeting. The committee welcomes submissions from the U.S. as well as international proposals, and this year the committee strongly encourages the composition of panels and workshops that include women, under-represented minorities and early career scientists and clinicians.

This year's meeting theme is

Psychiatry and AI: Promises, Perils, and Pathways Forward

Artificial intelligence is transforming psychiatric practice through advances in drug discovery, precision neuromodulation, digital therapeutics, and clinical decision support systems. However, these innovations bring significant challenges, including algorithmic bias, privacy vulnerabilities, model hallucinations, automation complacency, performance drift, lack of transparency, and ambiguous accountability frameworks.

While we welcome submissions addressing all areas of psychiatric research and clinical innovation, the Program Committee is particularly interested in rigorous research that examines not only AI's capabilities, but critically evaluates when, how, and for whom these technologies can meaningfully improve patient care.

The Program Committee for the Annual Meeting also welcomes proposals addressing the full range of clinical psychiatry research and practice, including but not limited to the topics below:

- Artificial intelligence
- Biological models of psychiatric illness
- Career development and psychiatric workforce development, retention and wellbeing
- Clinical practice guidelines development and dissemination
- Clinical trials methodology
- Diverse practice contexts and methods
- Diverse populations
- Education related to psychopharmacology and psychiatric clinical trials
- Health systems research related to psychiatry
- Interactive effects of pharmacotherapy and psychotherapy
- Interventional psychiatry
- Neuromodulation
- Precision medicine approaches to psychiatric clinical trials or practice
- Psychopharmacology
- Use of clinical and real-world evidence in psychiatry

2026 Submission Deadlines:

Workshops and Panels Proposals:	Tuesday, November 18, 2025
New Investigator Awards:	Wednesday, January 28, 2026
Posters:	Wednesday, January 28, 2026
Individual Research Reports:	Wednesday, January 28, 2026
Pharmaceutical Pipeline Presentations:	Thursday, February 19, 2026
Late-Breaking Posters	Friday, March 13, 2026

The ASCP Annual Meeting brings together over 800 representatives from academia, the [National Institutes of Health \(NIH\)](#), [Food and Drug Administration \(FDA\)](#), European regulatory agencies and industry, including competitively selected New Investigator awardees. In recent years, the ASCP Annual Meeting focus has been expanded to address a number of timely issues relevant to clinical research in psychiatry, including the translation of research into practice, the importance of regulatory issues, and pharmacogenetics and other means to personalizing interventions. A Program Committee for the Annual Meeting chaired by Drs. Tiffany Farchione and Carlos Blanco with representation of the sectors that are part of the ASCP community lead the direction of the meeting.

Registration will open in December 2025. Visit <https://ascp.societyconference.com/v2/> for registration and housing
