Rules regarding Conflict of Interest

The Accreditation Council for Continuing Medical Education (ACCME) requires that The American Society of Clinical Psychopharmacology, Inc., obtain the disclosure from any individual who is in a position to influence or control the content of an accredited activity of any financial interest or other relationship with a commercial interest which is any entity who produces, markets, re-sells or distributes health care goods or services consumed by, or used on, patients. This includes planners, faculty members, and authors. ACCME defines “relevant” financial relationships as “financial relationships in any amount occurring within the past 24 months that create a conflict of interest”.

Although ASCP does not consider that such relevant financial relationships necessarily give rise to bias or unbalance, it is the policy of ASCP that any such relationships be identified to the audience prior to commencement of the program. In addition, it is the policy of ASCP to resolve all conflicts of interest prior to the CME activity as per ACCME guidelines.

Each faculty member or author will be asked to send to the planning committee (depending on the particular meeting) a detailed abstract, and/or the paper to be presented, and/or the slides to be presented. Each abstract, paper, or slide set will be reviewed by the planning committee for content, presentation, and bias, in light of the faculty member’s or author’s relevant financial relationships. Changes to achieve scientific integrity and lack of bias may be required of the faculty member or author prior to the presentation.

EACH PLANNER, FACULTY MEMBER, AUTHOR MUST COMPLETE AND RETURN A DISCLOSURE STATEMENT. The form is included electronically in the submission online.
