

Name: Susie Breitenstein, PhD, RN, FAAN

Current Title: Associate Professor; Assistant Dean
for Research and Innovation

Affiliation: The Ohio State University

Candidate for: MNRS Board Vice-President

Personal Statement:

I have been an active member of MNRS since 2006 and have served MNRS in many capacities. Most recently, I served as past chair in 2021 and chair in 2020 of the Program Planning Committee. In 2020, in addition to the normal program planning activities, our group was charged with shifting all programming to virtual delivery due to the COVID pandemic and shutdown. This experience reinforced the adaptability and resourcefulness of MNRS volunteers, members, and the administrative team and embodies what I love about MNRS – members passion for nursing research and scholarship, student development, and innovation. I have also engaged in the Family Section RIIG and served as RIIG chair. This RIIG aligns with my research focused on implementing innovative delivery methods of interventions to promote and strengthen parenting and child behavioral and social development. I would be proud to serve the members of MNRS as the Vice President and believe my record of service to MNRS exemplifies my commitment to the growth of the organization.
