

**Name:** Amanda Emerson, PhD

**Current Title:** Associate Professor

**Affiliation:** University of Kansas Medical Center

**Candidate for:** MNRS Board of Directors, Nominating Committee

**Personal Statement:**

My interest in serving as a member of the Nominating Committee is three-fold. In 2024-2025, I served as Chair of the Health Promoting Behaviors Across the Lifespan Research Implementation and Interest Group and am seeking this opportunity to take on a broader leadership role.

I am eager to meet MNRS leaders and learn more about the governance of MNRS. Serving on Nominating Committee would give me an opportunity to contribute to shaping the future of MNRS through recruitment of nominees as well as opportunities to connect and learn. As a nurse researcher with a background in the humanities and experience in community-based, community-engaged research, I would bring, if not a unique, at least a particular set of experiences and perspectives to the Committee.
